

Radu LUPAESCU

Senior Software Engineer | Full Stack Developer

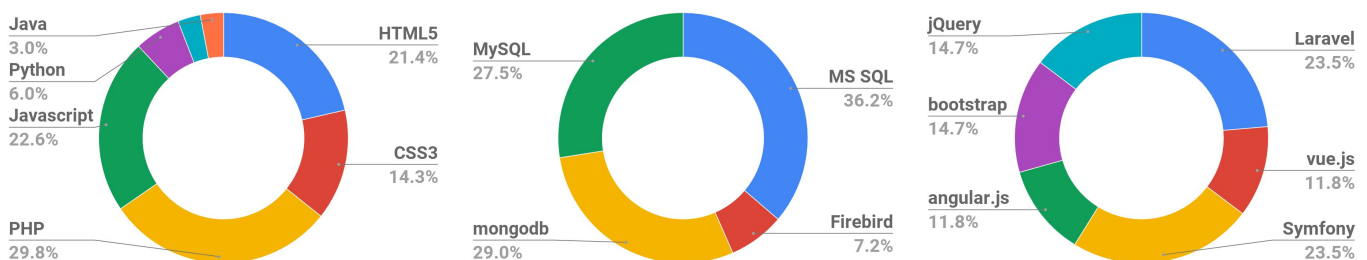

radu.lupaescu@gmail.com | +40 (763) 668 887 | Bucharest

/* ABOUT ME */

I'm a **techie**, passionately seeking to understand any intricate mechanisms. I always wonder what makes our world turn, and because of this I **enjoy solving puzzles**. This **helps me relax**, especially when I manage to find a **simple solution** for a pressing issue. During my school years I followed my calling and sought to learn as much **maths** and **computer science** as I could and in my spare time I strived to balance my scientific tendency with artistic activities (I was part of an acting group). I **have lots of energy** and I invest a lot of it in what I do, I am sure I **can fit in any team** and I enjoy solving any tasks, but programming will remain my one **true passion**.

/* SKILLS & TOOLS */

/* PROFESSIONAL EXPERIENCE */

2Checkout

(April 2018 – Present day)

Senior Engineer | Full Stack Developer

I'm part of the **Cart Team**. 2Checkout enables vendors to sell easily by abstracting the legal and accounting involved in cross border selling by employing a reseller business model. In the Cart Team we build what the shoppers see. I work with **PHP** (most of our projects are Laravel) and **Vue.js**. Almost everything is **service oriented** and our services are **JSON RPC** or **REST**, depending on their age :).

High-Tech Systems & Software

(April 2012 - April 2018)

Senior Engineer / Technical Team Leader

As a programmer and later **team leader** of a PHP Web Development team, I had the opportunity to **lead and implement** some interesting projects. I also had the opportunity to take part in **negotiations, project planning** and **business analysis**. We developed custom software and, if needed or requested, integrated Open Source solutions to address business critical issues like Document Management.

`/** @projects $notableProjects */`

Medical Clinic Software, Marketing Automation Tool involving **machine learning** and Merchandising and Trade marketing software for a big pharma retail company.

Romsys

(October 2010 - April 2012)

Programmer

I was part of the **Business Solutions department** and I split my time between documenting business cases and developing solutions for clients. My responsibilities included developing **new features, time and effort estimation, communicating with other departments** including sales, pre-sales and project management.

`/** @projects $notableProjects */`

My flagship contribution was to a **document management** solution for a big european insurance company, my part was the **registration processes, scanning and triage**.

Luxoft Romania

(April 2008 - August 2010)

Programmer

I was part of a team of developers focused on enhancing **Operating Systems** and **Drivers** for **high load networking equipment**. Most of our programming was **C/C++** with a touch of **ASM**. My responsibilities included developing new features and maintaining legacy code.

/* STUDIES & BACKGROUND */

Polytechnic University of Bucharest

(October 2006 - July 2010)

Systems Engineering and Computer Science Faculty

Bachelor of Science, **Systems Engineering specialized in Bioinformatics**

"Unirea" National College of Tirgu Mures (high school)

(September 2002 - July 2006)

Mathematics - Informatics Class with Advanced English

National Informatics Olympiad participant in 2005 and 2006.

Cambridge English: Advanced (CAE) certification
